

ANGEL FRANCIS

Data Analyst

Ernakulam, Kerala | +91-7902830914 | angelfrancisjan11@gmail.com | LinkedIn | GitHub | Portfolio

PROFILE

Results-driven Data Analyst and MCA graduate with hands-on internship experience in data cleaning, data modeling, and Power BI dashboard development. Proficient in SQL, Python, Pandas, NumPy, Microsoft Excel, DAX, and Power BI, with a proven ability to transform raw data into actionable business insights. Delivered data-driven analysis across projects involving 5,000 supply chain shipments and 4,500+ vehicle theft records, utilizing interactive dashboards.

TECHNICAL SKILLS

Languages & Libraries: Python, C, Pandas, NumPy, Seaborn, Matplotlib

Databases: Microsoft SQL Server, MySQL

BI & Visualization: Power BI, DAX, Dashboard Development, KPI Reporting, Data Visualization

Tools & IDEs: Microsoft Excel, PyCharm, Jupyter Notebook, Microsoft Word

Core Competencies: Data Cleaning, Data Modeling, Exploratory Data Analysis (EDA), Data-Driven Decision Making

SOFT SKILLS

- Teamwork & Collaboration
- Communication Skills
- Attention to Detail
- Adaptability
- Willingness to Learn.

WORK EXPERIENCE

Data Analyst Intern

Nov 2025 – Present

Luminar Technolab, Kochi, Kerala, India

- Performed end-to-end data cleaning, data modeling, DAX measure creation, and dashboard visualization using Power BI.
- Delivered actionable business insights through interactive Power BI reports, enabling data-driven decision-making.

PROJECTS

Global Supply Chain & Risk Analysis | GitHub: <https://github.com/angel1234-ship-it/Global-Supply-Chain-Risk-Analysis>

- Analyzed global supply chain data across 5,000 shipments to identify disruption risks and operational bottlenecks.
- Identified 3,063 disrupted shipments (61.3% disruption rate), average lead time of 19 days, and a reliability score of 75.44%.
- Built an interactive Power BI dashboard with overview, product, location, and risk analysis views.

Tools: Power BI, Data Modeling, DAX Measures

Vehicle Theft Analysis — New Zealand | GitHub: <https://github.com/angel1234-ship-it/Vehicle-Theft>

- Analyzed vehicle theft trends across New Zealand using SQL, answering 36 business questions from the dataset.
- Uncovered 4,553 theft cases, a 72.96% year-over-year increase, with Silver identified as the most stolen vehicle color.
- Developed interactive Power BI dashboards covering overview, vehicle, and location analysis.

Tools: SQL, Power BI, Data Modeling, DAX Measures

EDUCATION

Master of Computer Applications (MCA)

Oct 2022 – Sep 2024

Mahatma Gandhi University, Kottayam, Kerala | **CGPA:** 8.24

BSc Physics

Jun 2017 – Aug 2020

Mahatma Gandhi University, Kottayam, Kerala | **CCPA:** 8.08

CERTIFICATIONS & COURSES

- Google Data Analytics Professional Certificate** — Google, 2025
- Gen AI Powered Data Analytics Job Simulation** — Tata, 2025
- Pandas Course** — Kaggle, 2025
